Eligible Service Lists
Internet Services
As of December 3, 2003**

NOTE: Descriptions in the section of limited to the provision of "basic conduit access" to the Internet and apply to services, not purchases of equipment used in Internet Access. Internet Access is an information service defined as "the offering of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing or making available information via telecommunications, and includes electronic publishing, but does not include any use of such capability for the management, control, or operation of a telecommunications system or the management of a telecommunications service."
